DETAILED ACTION

Claim Rejections - 35 USC § 112

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Claims 1-34 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Claim 1 is rejected because the term "impression" renders the claim vague and indefinite. The metes and bounds of patent protection sought are unclear. Claims 28-34 are rejected for analogous reasons.

The remaining claims are rejected as depending on indefinite base claims.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(a) the invention was known or used by others in this country, or patented or described in a printed publication in this or a foreign country, before the invention thereof by the applicant for a patent.

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

(e) the invention was described in a patent granted on an application for patent by another filed in the United States before the invention thereof by the applicant for patent, or on an international application by another who has fulfilled the requirements of paragraphs (1), (2), and (4) of section 371(c) of this title before the invention thereof by the applicant for patent.

Claims 1-3, 18-21, and 34 are rejected under 35 U.S.C. §§ 102 (a), (b), and (e) as being anticipated by Hutchings et al. (U.S. Pat. No. 5,076,960).

Art Unit: 1619

Hutchings et al. teach a deodorizing and cleaning compositions comprising less than 0.25 % of perfume in aqueous carrier containing 1-15% of alcohol. See col. 1, line 64 – col. 3, line 47. Claims 1-3 are thus met. The presence of above about 0.1-1% by weight of zinc chloride is also disclosed, meeting claims 18-20, in col. 4, lines 8 – 36. The reference further teaches that about 1-5% of surfactants as stabilizing aids may be used in the composition, meeting claims 21. See col. 5, lines 13 – 36; col. 1, lines 58-64. The reference also teaches that the composition may be used to deodorize fabrics using spraying, which meets claim 34. See col. 1, line 64 – col. 2, line 12; Examples.

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claim 22 rejected under 35 U.S.C. 103(a) as being unpatentable over Hutchings et al., as applied to claims 1-3, 18-21, and 34 above.

Hutchings et al. is discussed above. The reference fails to teach employing the surfactants of instant claim 22.

Given the broad teaching of using surfactants for the composition, it would have been obvious to one of ordinary skill in the art at the time the invention was made to have selected the conventional types of surfactants.

Double Patenting

Art Unit: 1619

The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the "right to exclude" granted by a patent and to prevent possible harassment by multiple assignees. See *In re Goodman*, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); *In re Van Ornum*, 686 F.2d 937, 214 USPQ 761 (CCPA 1982); *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970); and, *In re Thorington*, 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

A timely filed terminal disclaimer in compliance with 37 CFR 1.321(c) may be used to overcome an actual or provisional rejection based on a nonstatutory double patenting ground provided the conflicting application or patent is shown to be commonly owned with this application. See 37 CFR 1.130(b).

Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

Claims 1-34 are rejected under the judicially created doctrine of double patenting over claims 1-23 of U. S. Patent No. 5,939,060. Although the conflicting claims are not identical, they are not patentably distinct from each other because the patent and the application are claiming common subject matter, as follows: composition for reducing malodor comprising perfume, water-soluble cyclodextrin, water-soluble metallic salt, and solubilizing aid of same limitations, and method to make such composition.

Conclusion
